

# Dedicated Connect

**High-performance, stable Internet connections are indispensable for today's electronic communications. Dedicated Connect Internet connections from green.ch provide the foundation for your success.**

Dedicated Connect offers you the whole range of professional Internet access connections. National and international solutions with fiber optic connections ranging from a few megabits to several gigabits – each connection is tailored to your data communication requirements.

The green.ch Network Operations Center (NOC) monitors the stability and reliability of each connection 24 hours a day and ensures that the contractually agreed quality parameters specified in the Service Level Agreements (SLA) are adhered to.

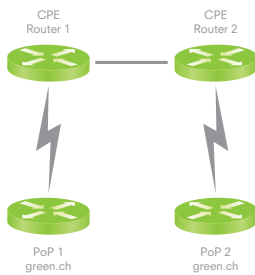

For customers who have special requirements, green.ch provides redundant Internet connections. green.ch also takes care of the complete design and implementation of provider-independent IP address space as well as redundancy concepts for multiple Internet providers (BGP4, PI networks, own address space areas). green.ch's own extensive national backbone and the close interaction with our international partners' data networks provide the basis for top reliability and quality.

## Your benefits:

- National and international Internet connections from a single source
- A solution tailored to your requirements, both in terms of bandwidth and performance guarantee
- Maximum availability through round the clock monitoring, seven days a week by the green.ch NOC team
- Direct backbone connection (except for xDSL)
- Redundant solutions for maximum independence

Service	Premium	Standard	Datacenter	DSL
Availability	99.99%	99.8%	99.95%	99%
Transmission speed	User-selectable			DSL bandwidths
IPv6 capable	Yes	Yes	Yes	On request
Point of presence	National and international		National	
Service and performance guarantee	Dedicated Connect Service Description (DS) and Service Level Agreement (SLA)			

## Dedicated Connect

### Premium

Dedicated Connect Premium provides the highest availability for your Internet connection. The fully redundant connection fulfills the highest service availability requirements.

### Standard

The Dedicated Connect Standard Internet connection is based on a dedicated line in the desired bandwidth. You have a direct connection to our PoP.

### Datacenter

Datacenter Dedicated Connect provides green.ch data center customers with a high-availability Internet connection. The direct connection over our backbone is designed as a redundant ring.

### DSL

Dedicated Connect DSL is based on the widespread DSL connections. The connections come with a Business SLA that guarantees high availability. This product is ideal for home workplaces, small companies and branch offices, depending on bandwidth and availability requirements.
