COLOCATION RACKS

Housing with added value

Rack housing in a Green data center offers many benefits: we provide standardized racks for server and storage environment – in rooms with multi-step access controls, redundant power and cooling systems as well as around-the-clock service.

To ensure the best colocation solution, we advise you personally based on our many years of experience in matters of housing and connectivity. We develop the perfect technical configuration and support at every stage of the outsourcing process.

Our offer

- ✔ Colocation in standardized rack and cage variants
- ✔ Maximum security and redundancy
- ✔ Low electricity costs thanks to a high level of energy efficiency
- ✔ Internet connection and both public IPv4 and IPv6 segments included
- ✔ 24 / 365 monitoring for security, power supply and cooling
- ✔ Geo-redundant solutions (e.g. data center Zurich West and Zurich City)

moving. forward. together.

Colo Basic 1/3 **S**	Colo Pro 1/2 **M**	Colo Pro **L**
Separately secured 1/3 rack – 10 Rack Units	Small space for high performance – 20 Rack Units	For business-critical servers and data – 48 Rack Units
1 Gbit/s shared Internet Access	Two 1 Gbit/s shared Internet Access	Two 1-Gbit/s shared Internet Access
3 IPv4 and /56 IPv6	3 IPv4 and /56 IPv6	27 IPv4 and /56 IPv6
—	Including 720 kWh	Including 2,100 kWh

Connectivity		
Internet traffic up to 15TB/month (fair use)	Internet traffic up to 40TB/month (fair use)	Internet traffic up to 100TB/month (fair use)

Options

Network
- Connectivity (e.g. dark fiber, Layer 2, managed VPN)
- Connections to other racks or to a cloud
- Additional public IPv4 addresses

Security
- Alternative rack locking systems
- Video surveillance installation
- Additional access badges
- Managed firewall or DDoS protection

Installation/Operation
- Supported relocation and installation
- Hardware for IaaS
- Rack equipment
- Rack-to-rack cabling
- ATS power switch

Other services
- Remote & Smart Hands by our experienced personnel, 7/24
