Press release

Green helps Ukrainian refugees by offering free internet access for the homes of host families and rental accommodation made available to refugees

With free internet access for Ukrainian refugees, Green is providing no-hassle aid in Switzerland with immediate effect.

Lupfig, April 7, 2022 – Keeping in touch with relatives in the war zone, finding out information, getting one's bearings and settling in in Switzerland – all this is of key importance to the refugees from Ukraine in the difficult situation they are currently facing. We are deeply shocked by their plight and are moved by the enormous outpouring of help in Switzerland. With immediate effect, Green is providing fast, unbureaucratic aid. For Ukrainian refugees with protection status S, Green will activate a free 12-month internet subscription. This applies to all accommodation provided by host families, NGOs and landlords giving assistance to Ukrainian refugees.

Through this assistance program, Green is demonstrating its solidarity with the people whose families have been torn apart and who have fled with only the bare essentials. "We aim to directly help the refugees and support all the private host families and organizations who are providing valuable help by offering accommodation," explains Roger Süess, CEO of Green.

We have set up a hotline at +41 56 460 29 52 to answer questions and to activate subscriptions. Until further notice, helpers and landlords who can provide evidence that they are housing refugees can apply for the free 100 Mbit/s internet connection for a period of 1 year. This offer is conditional on there already being a network connection to the accommodation.
