

Press release

Green Datacenter partners with HCL to help organizations accelerate digital transformation

The strategic partnership enables organizations to adopt cloud technology in highly data-compliant sectors in Switzerland.

Lupfig, November 2, 2020 – [Green Datacenter \(Green\)](#), one of the leading providers of data center services in Switzerland, is pleased to announce a new strategic partnership with [HCL Technologies \(HCL\)](#), a leading global technology company. This collaboration will help organizations adopt cloud technologies and improve client outcomes, especially in the DACH region, which is of strategic importance to HCL. Together, the companies will offer an end-to-end IT services portfolio, enabling organizations to strategically position themselves and create new market value, differentiation and revenues, all while adhering to Switzerland's stringent data privacy requirements.

Switzerland-based organizations in highly regulated sectors, such as financial services and healthcare, will benefit from a secure and robust digital foundation by leveraging public and hybrid cloud solutions. Green and HCL will also enable enterprises to digitalize their processes, allowing them to respond quickly and flexibly to new IT challenges.

The combination of HCL's deep domain expertise and strong delivery capabilities, such as the DRYiCE automation portfolio and next-generation innovation centers, coupled with Green's data center footprint, will empower organizations to transform into next-generation enterprises. Green, which was recently named Switzerland's leading provider in colocation services, also offers a powerful portfolio to clients, service providers and hyperscalers. Leveraging these strengths, the partnership will meet organizations' requirements for high-speed and low-latency connectivity, and leading-edge security and performance for hybrid deployment models. With HCL's expertise in cutting-edge technologies and business-centric commercial and service models, clients will now be able to drive innovation and keep ahead of the competition.

About Green Datacenter

Green Datacenter AG is one of the leading providers of data center services in Switzerland. The company runs five data centers at three locations in the Zurich metro area. The Lupfig campus was extended in 2019 with an 8-megawatt cloud data center, built specifically for the needs of national and international cloud providers. Another three new buildings will be added to the Lupfig campus in the future.

As a full-service provider, Green Datacenter offers IT infrastructure networking and an extensive cloud offering for corporate customers in addition to data center spaces and colocation services. Furthermore, Green Datacenter assists companies on their journey to the cloud with a cloud ecosystem.
